Current Education

Software Engineering Technology
Centennial College, Toronto, ON

Sep. 2020 – Current
GPA: 4.074/ 4.5

Relevant Courses: Java Programming, C# Programming, Software Methodologies, Web Application Development, Web Interface Design, Software Systems Design and Database Concepts

Academic Projects

Web Interface – Game Store

- Created a webpage for a game store that had a location map, showing store locations with the use of HTML and CSS; the game store has different web pages for different locations, and clicking a location on the map will redirect the user to the designated web page

Client-Side Web Development – Bug Smasher Game

- Developed a web game for smashing a moving bug and gaining points with the use of HTML, CSS, and JavaScript; as the user gains more points, the game becomes harder through increased bug speed

Unix/Linux – Web Page

- Used Ubuntu on virtual box to create an HTML web page, recorded the steps, and posted it on YouTube

Independent Projects

NIIT Learning Solutions – Database Development

February 2020

- Created a database of 2019 Hollywood, Bollywood & Nollywood films consisting of the director, month released, production companies, and gross income with SQL under 1 month
- Designed a sign-in GUI form that works with a MySQL database on Java in 1 month

New Horizons Computer Learning Center – Python Calculator

2019

December

- Created an interactive scientific calculator with 100 mathematical formulas using Python

Work History

Warehouse Line Worker

July 2021 – Present

Staff Plus, WestRock, Scarborough, ON

- Collaborated within a fast-paced setting to coordinate warehouse processes to meet production goals
- Leveraged the hand truck to move materials in accordance with safety processes
- Promoted warehouse safety by reporting or resolving safety hazards and observing OSHA guidelines
